TIFACS.org

Proposal #5

Education

Funding a cohesive program of consciousness study and its application to societal laws

Education Progress in parapsychology has been slow and is intentionally excluded from the academic world (with a few rare exceptions, as noted below) because there are concerted efforts by small groups of activists —most of whom are not scientists—determined to marginalize the field. For decades, such efforts were primarily associated in the United States with an organization called the Committee for the Scientific Investigation of Claims of the Paranormal, or CSICOP. Today (2019) they've adopted a shorter name CSI, for Committee for Skeptical Inquiry. The irony about CSICOP/CSI, which has strongly influenced scientific and public opinion about parapsychology, is that for many years they trumpeted the term "scientific investigation" in their organization's name, but they hardly ever investigated anything. One of the very few times they did launch an investigation, they successfully confirmed a claim about astrology. The committee was so shocked with that outcome that they intentionally suppressed their findings. The only reason we know this is because one of the members of their executive committee blew the whistle on them. As the influence of CSI has somewhat declined with the rise of the internet, we find the same mind-set still active, this time in the form of self-styled Guerrilla Skeptics on Wikipedia. They state their mission as the following: "To improve skeptical content on Wikipedia. We do this by improving pages of our skeptic spokespeople, providing noteworthy citations, and removing the unsourced claims from paranormal and pseudoscientific pages. Why? Because evidence is cool." The irony here is that these so-called skeptics are really not interested in evidence at all, because if they were, Wikipedia would provide articles on parapsychological topics that survey all sides of the topic. As it currently stands (2019), all those articles have been edited by guerrillas to be exclusively negative. Wikipedia proudly advertises that it can be edited by anyone, but in practice, that is not quite true. Wikipedia has an endless set of byzantine rules that editors have to follow; otherwise, proposed edits are not accepted. Taking advantage of this, the guerrillas have

rewritten parapsychological oriented articles as well as the personal biographies of scientists involved in parapsychology in such a way that a naïve reader going to Wikipedia for information will come away with a thoroughly negative opinion. Thus, a well-funded educational effort would do the following:

(a) Commission high-quality online written and video information that presents a more accurate picture of the state of the science, including how parapsychology explores the “big questions.” One initiative to do this is already under way, but to make that site more popular would require a dedicated public relations effort.

(b) Hire experienced Wikipedia editors to refine the existing biased articles to make them more accurate and balanced.

€ Develop new or revise existing Introduction to Psychology college textbooks, most of which today simply regurgitate old prejudices about parapsychology that were heavily promoted by CISCOP.

(d) Commission more accurate portrayals of what parapsychology is, and what it has learned, in TV shows and movies aimed at popular audiences.

€ Commission a series of academic and popular books by knowledgeable authors that describe the history, methods, and results of the various categories of study in parapsychology.

(f) Commission web-based or mobile-based experiments accessible to anyone.

(g) Establish endowed chairs of parapsychology within fully funded Centers for Consciousness Studies at major universities around the world, and provide funding for undergraduate and graduate scholarships, teaching, and research assistants. The last point is the most important because as long as this topic remains marginalized, there will always be a struggle to find students to keep the field alive and thriving.

We know, for example, from an endowed Chair of Parapsychology established in the mid-1980s at the University of Edinburgh, Scotland, that a single well-run graduate program at an established university can significantly revitalize the field. Three decades after that professorship was established, over seventy-five graduate students have gone on to gain doctorates associated with parapsychological topics. That one chair established the United Kingdom as world’s current academic center for parapsychology. The chair at Edinburgh was not the first time an endowed professorship for parapsychology was established. There were similar endowments at Harvard, Clark, and Stanford Universities in the late 1800s and early 1900s. But after the initial holders of those positions retired, subsequent professors were hired who were either not interested in parapsychology, or the funds that supported those chairs were usurped by the universities for other purposes. Thus, any new endowments that are established must be specified in such a way that the purpose of the chair cannot be

altered, and the individuals selected for those positions must be vetted as having appropriate interests. It is predictable that universities approached with the opportunity to gain endowed chairs of parapsychology will encounter vigorous opposition from existing faculty because nearly everything they think they know about parapsychology probably originated from highly distorted sources. Thus, the endowment initiative will require a companion educational and public relations effort to inform faculties and university administrations about what the topic actually entails. This initial educational effort might cost perhaps \$50 million, with most of those funds supporting the endowed professorships, student scholarships, and associated costs. On an ongoing basis, the costs would drop to perhaps \$10 million a year. Before the last and arguably most important proposed step is taken (the endowed chairs), it would be advisable to first launch a one- or two-year discovery project by a team of higher education experts. The mission would be to identify universities that are devoted to honoring the endowments and to ensure that the plan is both practical and achievable.

Dean Radin

Dean lays out the bare bones of a structure, but my request to him never centered on aliens, exopolitics, and certainly not the political or social ramifications of consciousness research. And yet here we are. How do you teach what consciousness science is showing us without that new knowledge reflected in our education now?

How do you fund research that contravenes our accepted religious beliefs while not doing so blinds us to real threats?

So what follows is how to actuate Dean's plan, whom we will ask to do it, and whom we will ask to pay for it. In this instance, the proposal goes to Robert Bigelow, Makenzie Scott, Melinda Gates, Ron Barron, Elon Musk, Mark Cuban and.

How do we make that happen? What needs to be done in any model is to streamline the pipeline of information.

The overall ask here of Robert Bigelow is to help found a consortium of billionaires to match the consortium of scientists. Each of the invitees is given both asks and benefits commensurate with their involvement.

Here we involve every billionaire in the same way, their area of interest and expertise either off-world or dimension. A look ahead 2000 billionaires times 100 million dollars each equals \$2,000,000 million or 2 million million dollars. That would be a good investment in the consciousness project.

So, Mr. Bigelow, I am asking you to lead this process. I am asking you to be both a salesman and an administrator. To solicit funds for deposit and distribution as outlined in this series of proposals.

The simple explanation: As you read these proposals, one thing that should be coming clear is that we are trying to create a consortium of like-minded billionaires to join a consortium of our best consciousness scientists to chart the best course for humanity given its current condition.

There are two general models of consciousness. They can be divided into physicalist and non-physicalist camps, one stating that consciousness is derived from our bioelectrical postulates and the other that consciousness is housed both in and out of the body.

These proposals have stated clearly that both extraterrestrial and extra-dimensional beings populate our planet and reality.

We believe in psychics. We believe in heaven, but when we see a transgendered person walk down the street, most of society cries foul. Yet that transgender person is making their decision based on nonlocal information. That transgender person is a walking embodiment of 4th dimensional thought.

The issue is that what most religions believe is almost true. Only when you explain this science does belief turn to understanding and understanding to acceptance and kindness. That transition of understanding will change the future of the earth. The explanation begins with education.

So, in line with Radin's categories, we are asking for the money to found a network of chairs of consciousness. We are asking Robert Bigelow to begin the process with McKenzie Scott and Melinda Gates. Once the chairs are established, this team of 3 billionaires splits, with Robert Bigelow moving over to the theory development proposal while Makenzie and Melinda remain to distribute the Standard Model of Consciousness globally on all media. This education is to explain the religious afterlife from a common conscious point of view.

To Robert Bigelow, we say:

Robert

I want to congratulate you and support your efforts regarding the conclusion of your recent writing contest. I look forward to reading the winning entries. I spoke with Colm about what we are doing at TIFACS and he said send me a proposal. This is that proposal.

What is next for BICS? What this proposal is stating is that you are among the few people who have the resources, understanding and will to advance consciousness research. This proposal, while asking you to contribute money to this effort, is really asking is your leadership and involvement by asking you to guide the money TIFACS raises into programs and policies that advance our understanding of consciousness and promote the benefits the world gets from that increased understanding.

I want to ask you a question, what's next? What are you going to do with the information and analysis you have collected?

Sit in the Theory Development chair of these proposals.

The following is the place to begin; just set that up and fund it, and it will grow.

A committee of 4 permanent and eight rotating members will evaluate funding proposals within consciousness science and distribute grants.

The four permanent members -Are the executive director of TIFACS, Noetic Institute lead scientist, the University of Arizona Center for Consciousness Studies, and the Bigelow Institute.

This committee will look to support research efforts in consciousness science by funding scientists with the funds derived from TIFACS fundraising efforts.

Robert Bigelow has a deep understanding of this landscape and knows how to manage this type of venture within consciousness science. Begin the plan to fund 20 chairs of Parapsychology using your judges and the Center for Consciousness to select where the chairs should be placed and what funding they should get. I would ask that the first chair be placed at the University of Edinburgh and be called the Dumbledore chair. If each chair is funded for 5 million dollars, this would need 100 million dollars.

The ask of Robert Bigelow

To fulfill the structure to fund consciousness science by supervising the creation of the 20 chairs of parapsychology using the input and guidance from the judges of the contest BICS just ran but also with the input of the Center for Consciousness Studies at the University of Arizona and the TIFACS board.

Where should the initial 20 chairs of consciousness be placed? Here is an incomplete list because these should go first, and then the scientists themselves sort out the rest. From the

point that the 20 chairs are identified, Robert Bigelow moves over to theory development, and Mackenzie and Melinda execute their part of this plan by bringing science to prejudice globally.

The chairs; are UVA, Princeton, Stanford, University of Miami, and the University of Edinburgh (A personal ask, I would like this chair to be named after Dumbledor), the University of Arizona, and the University of Toronto (Named after J. Norman Emerson). That's seven chairs and their locations. The other 13 should come from the board created to administer this process.

So, Robert, what am I really asking you for? I want you to raise 100m \$ from 2000 billionaires and place that money on account at the University of Arizona's economics school. They will be the fiduciaries, and the disbursements will be made public. That money is to be disbursed according to the general plan laid out in the applications of the science of reincarnation and be administered by the parties named in the book. I know the first tranche is 450 million dollars. But once the total of this plan is spent, right now estimated at 200 billion dollars, humanity will be on other planets and this group of billionaires will be richer and more powerful.

This will get messy. You have recently said that dealing with transdimensionals is dangerous. No shit. But you know it, and very few people do.

So here is the deal with all the billionaires. Get the money, put it on account, have a consortium of billionaires' fund consciousness science and its derivatives as defined, and do it now. Let all the best scientists humanity has to offer lead it.

Now let me remote view a future with this as a strategy for you and the other billionaire participants, the extra-terrestrials, and the transdimensionals who are all part of this request.

The value of earth is not just that it is in the Goldilocks zone, but its vast and vibrant gene pool of which we are a part. A war is being fought in sub-space over us for control of us, and the warring parties' intent is to keep us unaware of this. My writing to you puts us both at risk, except that this proposal, in its entirety, offers a solution to all parties.

For the billionaire class, reincarnation becomes viable as led by the technology transfer from the grays to humans, in exchange, say, easier access to the genetics they need so they can stop abducting people in the middle of the night. For the reptilians, it would be access to and acceptance by a larger community. This would mean the locations of the Martians in New Mexico and the multi-species operation at Area 51 become more open informationally. This would also mean disclosing the alien locations here at the south pole and on the moon. Humanity would access a level of understanding that would make it both interstellar and trans dimensional at once. That can only be done through a change of consciousness.

For you and the other billionaires personally, you collectively would be the first, and you would and could design your next life on the planet of your choice. Or stay right here on earth. But the markets for our exports mean we need global action on climate change and protect every species now to keep and protect that genetic inventory. The unbelievable opportunity for the billionaire class offered within this proposal is truly unprecedented. It brings peace to the grays and the reptilians as an offer of goodwill into the universe and our first organized attempt to contact the galactic federation. I want to add to every reader here that we have been prepared for by the ongoing alien manipulation of Hollywood to acclimate us to the reality of space and time. This is a planned and executed alien acclimation project.

Billionaires need to understand that for a scientist or a group of scientists to propose the scale, danger, and consequence of what this proposal is advancing would be academic suicide. But once this is funded, those very scientists should lead it.

Organizationally this proposal contains the basics to begin. Once the real money arrives, it will decide the structure, how to distribute new technologies globally, and who makes money from that process. A greening of the earth means a greening of humanity to maximize production from all levels of society. While this may be ideologically and politically poison to some, it is how the galactic federation views and values us as a remote emerging society on the edge of the galaxy we call the milky way. The bigger money is on their side of the view and what this proposal advances for the billionaires is in their own short-term and long-term interest. But there is an urgency to do it now, and that lies in the fact that you have less control of your future life if you die before the protocols are put in place. Funny but true nonetheless.

To McKensie Scott and Melinda Gates

It starts with you as foundational members per the TIFACS founding proposal attached below to deposit 1 million dollars each with a check made out to TIFACS, The Institute for Advanced Consciousness Studies. It should be sent to Fox Rothchild LLC esq c/o their escrow account. That will trigger in setting up TIFACS as a 501c3. TIFACS is the author of the document you are holding and is explained in the documents below. The remaining money you are being asked for can be directly given to the recipient institutions in the attached founding proposal or simply run the whole amount through TIFACS. (www.TIFACS.org)

This is the science that supports the causes you support. In your proposal, you will find where the initial donations will go and what is expected of them.

Each of the recipient institutions in this request has deliverables, and then once they are delivered, the science behind gender diversity is explained and scientifically normalized as an expression of our higher consciousness. Religious law is rewritten, removing apostasy, blasphemy, and celibacy. How and why are explained in the documents below.

I am asking you to circumvent conservative school boards and religious institutions to deliver a scientific factual narrative to the collective benefit of the recipients that will be accessible for free from any cell phone.

It is and will be an Ideological vaccine against racism, sexism, and malignant nationalism. The postulates of this new science I am personally asking you to propagate is that we are all in this together. I am not asking for money for free from anyone. I am asking for an investment to purchase something that you personally can afford and, by doing so, support everyone one of your causes, be this Scott, Gates, or Bigelow. The run time on this project is one generation from the date of launch. Attention other billionaires, if one of the previous three whom I have asked cannot or will not join this effort, anyone can step into those shoes. There is plenty to do, so this is a general call for money support and your personal involvement as well.

You will face prodigious headwinds. This is not a cure for deep believers of faith it is acceptance of all faiths and genders across the spectrum of consciousness both here and in a wave state where manifestations of gender are more nuanced because of having lived multiple lives in multiple conditions.

Without acknowledgment of our reality, we constrict our future by limiting our resources. So, we are teaching that every human's basic economic right is access to their own checking account, not managed by anyone else, and through cryptocurrency, expand banking and thereby tripling global output.

Only the 2000 billionaires can make this happen and circumvent governments and school boards and teach what consciousness really is, and by doing so, prepare humanity for space travel.

Consciousness has to stand that interstellar flight. That is why we have to realistically map 4th dimension consciousness because that is the terrain, we must traverse to achieve interstellar flight.

My first invitee Robert Bigelow understands this. Together you, he, and others will manage. disburse and execute a plan to find out what we all want to know; what's next?

I am asking nothing less of you than putting this information on a global platform in all languages to teach every person with access to the internet what our factual reality is; it's all of us.

Ownership of the results of the observations and experiments would force social change. It would be a good way to commit academic suicide and my job is to protect them from such forces. One way is the structure of the consortium, the herd concept protects them individually.

The other benefit is by infusing consciousness science with funding their output is facilitated and $1+1=3$ simply by the removal of impediments and that has to be layered.

So, McKenzie, I am asking not just for money but for your guidance and support here to become a shield to all of your other LGBT investments that invest in protecting people and, in some cases form themselves.

This heartfelt and reasoned cause needs resources and the resource I am asking for is you. You don't even have to do the job the chair of education requires. I want you to be its guardian angel.

Melinda

I would ask you to share the education chair with McKenzie. As a team, you could install a global library of truth on every cell phone. It would be the founding of an education system based on science, fact, and maturity. Same deal for you as Makenzie, 1 million dollars down as the consortium sorts their needs. You will lead the portion of the money allocated to education in Radin's plan.

So funding, take the standard model of consciousness book that is being prepared by our best and brightest and take religion and create a common denomination that consciously includes everyone in the whole. We print it and distribute it.

So, let's talk about why, where, and how to spend 50 million dollars to organize this. The structure has to be built out and clear.

Billionaires in this tranche are Ron Barron, Elon Musk, Mark Cuban, and Charles Koch.

Ron Baron

Ron, you are probably wondering what this is all about, so let me paint this for you in broad strokes and explain why I am at your door. This is VC Money for development but also primary research. Control of this work product means control of everything.

There are 2 camps in consciousness research, the materialists are represented by the consortium, and the non-materialists are represented by the Bigelow group. These 2 groups need to come together to produce an overall model. Each group has made its case as being valid by the result of analytics—something you know a lot about.

Funding for genuine research to do this is hard to come by. The reason is these two previous opposing groups and academia itself is run as a cottage industry. This proposal is doing a roll up and the value of its whole will be larger than the sum of its parts.

The model this proposal creates is Edison's workshop on a large scale and deals with consciousness, interstellar travel, and artificial intelligence. The reason for that statement is consciousness has to do the travel where matter can't, and connect to AI, which is something Elon Musk is struggling with. This work/proposal is his answer and coming together like this is a better plan than Elon can execute himself. In short, he can subcontract his effort to this group collectively and get a better, cheaper result if he does it himself.

You know where I am going, 450 million is not enough. The arms industry spent a billion dollars lobbying congress and made 2 trillion dollars from the Afghan war. So, I posit the following the 450-million-dollar tranche is organizational, the next tranche needed will be a billion dollars for practical applications and done this way, the projected revenue stream from applications of discoveries will be in excess of 2 trillion dollars.

Now justification to do this is to connect AI to the mind you need to connect materially, connecting the matter of AI to the matter of the brain, and non-materially, harmonizing the waveform transmission with the waveform of the mind. When that is done you have a new device to look across reality and that is RAIV. I am not going to get into the rabbit hole but it is explained in chapter 14 of the Mathematics of the Science of Reincarnation. It's on amazon.

I should note that the CIA is well on its way to creating a remote artificial intelligence viewer, but at its core this funding will expand that.

So, 50 million is in for you to sit at the table with the understanding that you are the house VC, guiding us on how to fund, market and package. And TIFACS, through these scientists, solves Musk's AI problem.

This really is beyond the reach of governments because it is about all of us suffering the same fates, top to bottom, left to right; we all drown in rising seas. We have to sort our priorities. The only way to design a system that delivers the best results is to make sure people can make money from implementing the plan. It has to be a win-win and the best of all alternative models.

Elon Musk

Elon

I am asking for the fifty million in this initial proposal to know where to put the next 100 million. This gives you access to manifestations of consciousness, something your device will need to deal with. I could say it's a no-brainer for you as both you and consciousness science is the better for it, and this proposal is delivering the world's best to you.

Mark Cuban

Mark

In a sentence, I want you to contribute 50 million dollars to this effort and commercialize anything that falls out of the research and application that comes out of the consortium's work with Elon Musk. What we are proposing here is a research lab on a global scale with transcendent results.

Mark your 5 million becomes 50 100k grants to commercialize any products resulting from this research.

We want to get 5 million dollars each from 90 of the world's 2000 plus billionaires. The research money goes to institutions listed in the map of consciousness which can be found on our web site just below my open letter to you which and includes Stanford, Princeton, UVA, University of Miami, Edinburgh University and others.

The schools and Universities as well as the billionaire investors share proportionally the derivative intellectual property of any advancements that are made from this endeavor. We propose that as the first tranche.

The Institute for Advanced Consciousness Studies (www.tifacs.org) is an organization designed to raise money for, precisely that, consciousness science.

This letter to you is part of a series of letters and initiatives designed to do just that, fund consciousness research.

At present, models of consciousness can be subdivided into two distinct, broad categories:

Models of the first type: physicalist models holding all consciousness as being contained within an organism's neuroanatomy.

Models of the second type: nonlocal models—historically conceived of as esoteric/spiritual/religious and distinguished by the assumption that a significant aspect of consciousness is not limited to the neuroanatomy, hence nonlocal.

Starting with odds-against-chance calculations within each observable discipline of this science, children who remember prior lives, NDEs, and past-life regression, and continuing through processes of nonlocal consciousness, nonlocal perception remote viewing, ganzfeld, presentiment, retrocognition/precognition, and nonlocal perturbation random event/number generator (REG/RNG) influence, the book makes the case that all of the above is interconnected. The above are fractal observations which operate on fractal processes, and the sum total is a Mandelbrot set. The fractal geometry of nature supports and proves the fractal nature of our consciousness and with it a mathematical proof that consciousness does not end at bodily death.

This emerging scientific model implies an awareness, intelligence and self-reference after death—in short, what the religious would call a soul. That soul is comprised of ordered information.

Uploading information to the cloud and downloading information is the same as dying and being uploaded to heaven and then downloaded to a new body. In fact, they are fractals of differing size, because at the end of the day, you are simply information.

In each case it is the transfer of information. Our technology constantly changes our belief system. This is a major change.

The model we have advanced indicates that this is already happening to us and that our development in data processing is a fractal expression of this/our reality. That means there really is a heaven as we believe, but its structure as revealed by our observations and experiments, is more homogenous than our separated belief system would indicate. It is not a heaven and a hell of fire and brimstone, apostasy, celibacy, or blasphemy but a rather equitable place of learning.

Given what we have learned about a federation at the center of our galaxy helping emerging species, there is much yet to emerge, especially as we develop a common consciousness.

Even without all of the above, the Grays are using this type of science to “Transfer their essence” into a new hybrid body of human and the Gray mixed genetics. This science is that science, and we can recognize it in alien cultures, but when it comes to our own, the belief system most of us possess will not allow for this possibility.

Given the model of the information, its math structure, and the arc of data processing by 2050, we should be able to upload and download to the cloud more information than exists in the human body.

At the same time there has been and will be continued alien contact and information passed between alien species and our own. We need to be cognizant of that as a species and the blocks to that information being passed removed. Personally, Mr. Bigelow, that is at the core of your personal search, and I am not asking you for 50 million dollars; I am asking you to direct the spending of 500 million dollars in that search. Setting up the 20 chairs of consciousness is simply improving the network of research needed to fulfill the CIA and the alien’s desires, connecting our minds to the machines we pilot through the universe. In the course of that, our navigational ability in the dimensional manifold will cross the intersection of your past that you seek and will be there when you need to visit. While I can guarantee it’s there, it is only reachable in its dimension, and that is ethereal.

Conjoining what the religions want you to believe and what the technology and emerging model of consciousness would support is something we can no longer ignore. It is awareness in another dimension.

Through this dimensional manifold, we have a window into cognition in a different waveform in time space. The ramifications change how humanity should manage itself and our world because this dimensional manifold gives us scientific access to a region of time-space that we could only believe existed. This information impacts data processing, space travel, and human development and design through AI (artificial intelligence) and CRISPR (clustered regularly interspaced short palindromic repeats), which form the basis for CRISPR-Cas9 genome editing technology and go directly to human governance and development.

This cognitive science goes to national defense because it exposes cognitive movement in a dimensional manifold. In fact, space travel and the afterlife are joined scientifically through cognitive intent and a dimensional intersection between the third and fourth dimensions.

By time having mass (mass being defined as ordered information), you have objectively started mapping a fourth dimension we can see into. In doing so laid the groundwork for a propulsion system through time and navigation of that area of time-space. Don't you think we will encounter cognitive life in a fourth, higher dimension when it exists here in profusion in the other three? If you distill the exit interviews of alien abductees, nearly all were communicated with telepathically. That communication is nonlocal, and the odds against chance calculations are the same as Moody's on NDE's. Certainty.

This science is evolving faster than we are keeping up. With one leap, it can be weaponized against us at any point from any point. These are common threats to us all. Our effort in response has to be collective, cohesive, and immediate. This is a call to academic arms, and the only way we can do this research efficiently is to do it together. *The Mathematics of the Science of Reincarnation* presents a malleable and inclusive plan from which we can all participate and benefit.

So, mark, what is the commercial value of owning the rights to a reincarnation model of information transfer under a new company called Bio Data Services? We have the math proof, we see it being used by extraterrestrials, the grays, and we cannot have this new science model without changing our views of consciousness. I ask you to call Stuart Hameroff, and give him 5 million dollars to be given out in 20 grants, so each school with a chair gets \$250K to begin this cohesive and comprehensive program.

In conjunction with that, I ask Robert Bigelow and his group of judges to act as an advisory board to where these seeds are sown. I ask you and Bigelow and Scott and Gates to each be founding members, and if each of you commits 50 million, begin a project that changes humanity. But Mark, I need the 5 million right now. I don't get a dime. TIFACS is

fundraising here, just call Hameroff and write him a check for 5 million and ask where it should be spent. Let me explain the significance of Applied Research in the next chapter and why that has to force a change in self-governance.
